October

This month we have been continuing with many of our topics. We have been working hard to learn our times tables and using them to help us with the rest of our maths work.

In our writing lessons we have been focusing on the wind in the willows. It is a brilliant book with so many interesting characters!

Our topic this term has been rivers. Year 3 have learnt all about where water comes from, and how it ends up coming out of our taps.

For their trip they went on a cruise of the River Thames. Where they got to see some of London's best sights, including Tower Bridge.
