Playing the Game

It is believed that tennis was first played hundreds of years ago in France. To begin with, a ball was hit with the inside part of the hand but things have changed a lot since then. These days, players use a racquet (racket) which makes the ball travel a lot quicker. When a player starts a new point, they throw the ball above their head and hit it hard. This is called a serve. The fastest speed for a serve at Wimbledon is 238 kilometres per hour. This is about the same speed as an average helicopter.
