

This month we had lots of fun exploring the topic of "Predators". We've looked predatory animals, plants, food chains, habitats and learned the key parts and functions of animals and plants. We've even dissected our own owl pellets to discover what the owls had eaten. Gross but fun!

During our Computing lessons, we have been trying to get used to navigating our way around Teams, Bug Club and Times Table Rockstars. We will continue practising so that we can all continue working on them at home!

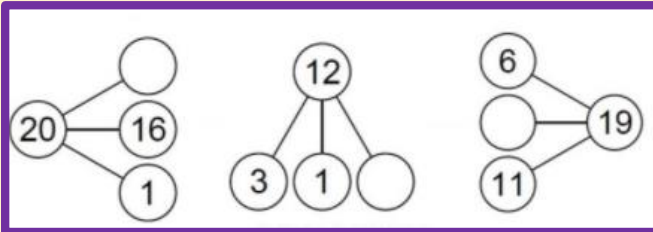

OCTOBER

In maths this month, we have been working on lots of addition and subtraction. We have used a lot of different methods, such as - adding and subtracting with a part whole model, place value charts and even the column method.

For Writing, we've explored different genres. We finished reading our class book "Fantastic Mr Fox" by Roald Dahl and wrote newspaper articles about Goldie the bird that had escaped from London Zoo. We now know the difference between open and close questions and we're all excellent at writing interviews!

We started working in our own Phonics groups and it's been extremely helpful recapping some of the sounds we learnt in year 2 and learning how to sound and spell out new words. We will continue working hard in Phonics until every child in Year 3 is an excellent reader!
